

Sufyan Arshad Kadiwala

MSc student, Artificial Intelligence & Robotics · Data Science & Machine Learning

Address: Alsenberger Straße 53, 95028 Hof, Germany

Phone: +49 176 28266324

Email: kadiwalasufyan03@gmail.com

LinkedIn: linkedin.com/in/sufyan-arshad-kadiwala-a35717290

GitHub: github.com/sufyan1105

PROFILE

MSc student in Artificial Intelligence & Robotics at Hof University of Applied Sciences, holding a Bachelor of Engineering in Artificial Intelligence & Data Science (Major with Honours in Cyber Security) from the University of Mumbai. Practical experience in machine learning and data analysis through internships and self-built end-to-end projects — from data preparation and modelling through to a working web application. Certified through the Google Advanced Data Analytics Professional Certificate (7 courses) and the Machine Learning Specialization from Stanford University & DeepLearning.AI (3 courses). Seeking a working student (Werkstudent) position or internship in data science or data analytics, 20 hrs/week, remote or hybrid.

EXPERIENCE

Machine Learning Intern

Bharat Intern · Remote · 08/2023 – 09/2023

- One-month virtual internship programme focused on machine learning.
- Supervised tasks across data preparation, model training and evaluation in Python and scikit-learn.

Data Science & Machine Learning Intern

Ybi Foundation · Remote · 2023 (1 month, completed 08/2023)

- One-month certificate programme with an integrated internship in data science and machine learning.
- Practical tasks across the full workflow: exploratory analysis, feature engineering, and training and evaluating regression and classification models.

EDUCATION

MSc Artificial Intelligence & Robotics

Hof University of Applied Sciences · Hof, Germany · since 03/2026

Bachelor of Engineering – Artificial Intelligence & Data Science, Major (Honours) in Cyber Security

Rizvi College of Engineering, University of Mumbai · Mumbai, India · 08/2021 – 05/2025

- Final examinations 05/2025; degree conferred 17 January 2026.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, HTML/CSS

Machine Learning: Linear & logistic regression, neural networks, decision trees, random forests, clustering, anomaly detection, recommender systems, reinforcement learning, model evaluation & tuning

Statistics & Analysis: Descriptive statistics, probability, sampling, confidence intervals, hypothesis testing, regression analysis, exploratory data analysis, predictive modelling

Libraries & Frameworks: Pandas, NumPy, scikit-learn, TensorFlow/Keras, Matplotlib, Seaborn, Flask

AI & LLMs: RAG, embeddings, Ollama, Llama 3.2, OpenAI Whisper, prompt engineering

Tools & Platforms: Jupyter, Google Colab, Git & GitHub, Tableau, Power BI

PROJECTS (SELECTION)

Four machine-learning models on my site run as interactive demos entirely in the visitor's browser – no server, no API: sufyankadiwala.de/projects

Bike Sharing Demand Prediction

Python, scikit-learn, Random Forest, time series · github.com/sufyan1105/Bike-sharing-demand-prediction

- Hourly demand from 17,379 records, evaluated on a chronological rather than random split – a random split trains on the future and inflates every metric.
- Random Forest: R^2 0.893 (RMSE 72 rides), 34 R^2 points above the Ridge baseline; hour, month and weekday cyclically encoded as sine/cosine pairs.

House Price Prediction

Python, scikit-learn, Pandas, Random Forest, Flask · github.com/sufyan1105/House-Price-Prediction

- End-to-end regression pipeline on the California Housing dataset: exploratory analysis, feature engineering, median imputation, standardisation and one-hot encoding.
- Random Forest: RMSE \$49,432 $\pm$ 2,125 under 10-fold cross-validation, about 29 % below both the linear and decision-tree baselines.

Used Car Price Prediction

Python, scikit-learn, Random Forest, feature engineering · github.com/sufyan1105/Used-Car-Price-Prediction

- Regression on 15,411 vehicle listings; R^2 0.9333 on the held-out test set (0.9262 ± 0.0105 cross-validated), nine R^2 points above the linear baseline.

RAG-based AI Teaching Assistant

Python, RAG, Ollama, Llama 3.2, embeddings · github.com/sufyan1105/RAG-based-AI-Teaching-Assistant

- Five-stage pipeline from raw lecture videos to a queryable assistant: video $\rightarrow$ MP3 $\rightarrow$ timestamped transcript chunks $\rightarrow$ bge-m3 embeddings $\rightarrow$ Llama 3.2.
- Answers cite the video name and timestamp; every stage runs locally through Ollama, so no lecture content leaves the machine.

CERTIFICATIONS & TRAINING

- 08/2026 – The Ultimate Job Ready Data Science Course, CodeWithHarry
- 09/2025 – Machine Learning Specialization, DeepLearning.AI & Stanford University (3 courses)
- 08/2025 – Data Analytics Job Simulation, Deloitte (via Forage) – unpaid job simulation, not an employment relationship
- 12/2024 – Foundations of Cybersecurity, Google
- 10/2024 – Google AI Essentials, Google
- 10/2024 – Google Advanced Data Analytics Professional Certificate, Google (7 courses)
- 06/2024 – Power BI for Beginners, Simplilearn SkillUp
- 03/2024 – Tech Workshop Series 2024 “Artificial Intelligence & Machine Learning”, Techobytes Technologies in association with the ITC, IIT Bombay (2 days, certificate of participation)

All certificates are verifiable online. Proof available on request or via the verification links on my website.

LANGUAGES

German: B1 (actively improving)

English: C1

Hindi, Gujarati, Marathi: Native speaker

AVAILABILITY

Hours: 20 hrs/week during term time (as permitted by my student visa), full-time during semester breaks

Start date: immediately

Work setup: remote or hybrid; happy to travel for on-site days by arrangement

Looking for: Working student (Werkstudent) position or internship in data science, data analytics or machine learning
